

LOUIS ALTHEA BEACH

ENVIRONMENTAL POLICY

In Louis Althea Beach we have realized the need to protect the planet's natural resources, Cyprus in particular, as well as our share of responsibility. Therefore, we constantly strive to reduce the environmental impact from the hotel's activities and we are committed to pursuing the highest environmental sustainability.

Environmental Management: Our vision is to create a culture that aims for: *“a sustainable society where we can satisfy our own needs without reducing the possibilities for future generations to satisfy their needs”.*

Our goals for summer 2022 are to reduce the consumption p/bednight compared to 2021, and keep it as close as possible to 2019 performance:

	Vs 2021	Vs 2019*
• Electricity	-33%	+ 16%
• Water	-22%	+ 15%
• Fuel	-23%	+15%
• Gaz	-37%	+ 15%

**Due to the low occupancies the number of bed-nights are considerably higher compared to 2019.*

To achieve the set yearly goals, Louis Althea beach:

- Has adopted environmental & sustainable management systems in accordance with
 - **ISO 9000:2015**
 - **ISO 14001: 2015**
 - **EMAS**
 - **GREEN KEY**
 - **TRAVELIFE GOLD**
- Has created a sustainable team, which is composed from all department heads and assigned the general manager Mr. Nicos Kleftis as the head of the team.

- Complies with the relevant environmental legislation & take a proactive approach to future requirements & obligations for sustainable management to continuously improve the environmental footprint.
- Identify, assess and review the environmental objectives, impacts and targets of the hotels.
- Monitor and measure the following key areas of environmental impact: Use of material, hazardous substances, equipment, tools and parts, energy and water general waste, organic waste, recycle waste
- Involve employees and develop their environmental awareness and sensitivity.
- In collaboration with our suppliers, seeks to purchase products that are environmentally friendly, have high energy efficiency, low water demands, reduced packaging and are certified for sustainable production and distribution (FSC, MSC, Fair Trade, etc.)
- Promote cooperation with local authorities and organizations concerned with environmental issues.
- Implement good practices and controls to protect the environment and prevent pollution.
- Manage equipment and materials to the end of their life cycle.
- Shall be prepared and trained to deal with emergency situations.
- Informs guests about the applied measures in regard to our environmental and social responsibility and encourages them to help the hotel achieve the set goals by following a few simple and easy practices during their stay.

All our actions comply with the Cyprus law and European Union directives.
